Laid at the Wrong Door.

A political cartoon titled "Laid at the Wrong Door." The scene is set in front of a building with a large arched doorway. Above the doorway, the words "DEMOCRATIC ADMINISTRATION" are inscribed. A man in a suit is reclining on the steps leading into the doorway, looking relaxed. To the right of the building is a high, rough stone wall. A man in a top hat and a long coat is walking away from the building towards the wall. He is carrying a large sack over his shoulder, which has the words "Wages & Profits" written on it. The cartoon is signed "H. H. H." in the bottom right corner. At the bottom left, the date "MARCH 22 1903" is printed.

DEMOCRATIC
ADMINISTRATION

Wages & Profits

MARCH 22 1903

Mr. Blaine said that the "free-trade" tariff of 1846, the last in our history, was satisfactory to all parties; Mr. Morrill said the tariff of 1891 was designed as a temporary war measure and not as a permanent peace tariff; the McKinley act is the crowning atrocity of a series of legislation designed to benefit the classes at the expense of the masses. Under Republican tariffs the country has experienced its greatest panic, that of 1873, passed through its greatest labor riots, those of 1857 and 1894, has witnessed the birth of trusts, trusts, and industrial, the increase of strikes, lock-outs and overproduction, the disappearance of a magnificent merchant marine, the capture by England of the markets of our neighbors, the payment for political contributions by permitting the contributors to write the schedules of a new tariff for reimbursement, in short, the growth of a system, as Senator Ingalls, said (Feb. 15, 1878) under which "the rich are growing richer and the poor are growing poorer; a system which gives to a Vanderbilt the possession of wealth beyond the means of any man; condemns the poor to a poverty which affords no refuge from starvation, but the prison or the grave." To this I may be added the constant that the Republican party has given away millions of acres of the public domain to railway combinations, and, in 1893, committed the great and wide-reaching crime of demonetizing silver. Every man in Utah knows that our boom subsided and hard times commenced in 1890, three years before Cleveland's inauguration, and that the present act is still in force.

Notwithstanding all these facts, the Republican party seeks to lay its hands on the door of Democracy.

MR REED OPENS THE REPUBLICAN BALL.

Southern Democrats Are Bright,

Statements, Quotes Mr. Wilson.

vented any good which the friends of the measure were disposed to claim for it.

"After the repeal of the purchasing clause had uncovered the real situation of the country it then became the duty of Congress, even from a Democratic point of view, to pass such a tariff bill as would give to us a reasonable degree of assurance that the basis established would be one that would be permanent for a sufficient period of time; a period at least so long as the victorious party was in power. Instead of realizing the great growth of the statesmanship, that which ever is to be done in the world has got to be done in accordance with the wishes of the people who live in it, the gentlemen in charge of the tariff bill in the House of Representatives undertook to ignore the varied interests of the country and to maul a tariff bill not in the interest of the nation, not in accordance with the wishes of the people, but in accordance with certain theories which they thought might possibly fit their dream of ultimate free trade. Such a bill, framed in such a manner, was doomed from the moment of its inception. It was not adapted to this country; it was not adapted to the present; it was not adapted in any way to the situation in which the country then found itself.

"Coddling Manufacturers."

idea we must dismiss entirely from our minds. The fact is, the bill is not finality. Let it be understood I do say this under my own authority, desire to give the opinions of the oratorical leaders themselves upon the subject."

Mr. Reed then quoted from the remarks of Mr. Wilson in the House. Mr. Mill's in the Senate to show that the tariff had gone step by step the march toward free trade.

Mr. Reed, continuing, said:

"How many errors, how many blunders there may be in the tariff bill as it has finally reached the president and not yet discovered, only be conjectured.

As He Sees Sugar.

"I have not permitted myself to comment upon the scandalous stories even visible scandal connected with the passing of the tax upon sugar. But it is due to the country that aspects of it which are commented on should be carefully and fairly dealt with.

"The House of Representatives fit to not only abolish the sugar bounty but also to take off the duty connected with the sugar tariff. When bill arrived in the Senate, it was gaged in the task of passing a

and Orchard, Me., Aug. 25.—Ex-Speaker James B. Reed opened the Republican campaign in this state here this afternoon with a speech which called forth the heartiest cheers from the thousands of people. Mr. Reed's main effort was to show that the "Democratic party had become itself incapable of running the country satisfactory, not only to the majority of the people but even to the large minority which helped compose it." His argument was as follows: "In saying the Democratic party has become itself incapable of running the country in a manner satisfactory, not only to the majority of the people, but to the large and respectable minority, which helps to compose it, I am not indulging in any language of partisanship, but in the language of truth, known and acceptable to all who hear me today. The

men like the Republicans, and of men of business sense and ability. The difficulty with the Democratic party today, as it has been for many years, is that the great majority resides in the southern men are men of intelligence, men of industry and energy. The difficulty with them is kind of learning which arises from thorough knowledge of business as it is carried on in the north. The men of the south may have every opportunity to read in books of the prosperity which is made in the north, but they do not do it, as have those who have done it. As he devoted to the theory of a by-gone day. His mind is not on the practical side of the industrial and the prosperity of his part of the country in the days before the war.

It would be a great mistake for the people of the United States to suppose the action of the Senate, so much

as can people is something which is defensible; the protection in spots, protection here and protection there, is not a justly open to the charges which are falsely made against the free protection.

Then Mr. Wilson's bill, which was framed with reference to the wishes of New England and of the manufacturers of a certain description who have been dallying with democracy, is a bill which it there met the varied interests of the country in a more full and complete fashion, and meeting those interests, it was brought to the House amended by 600 and more amendments, and changed in its character and in its design so that the Senate absolutely declined to receive it. Then ensued a struggle, the like of which has never before been a part of the history of the country, and the history which ought never to be a part of the history of any democracy.

Tommy is Shocked.

Working the Pension Racket.

"By the Democratic party and the country in general, was to be deemed to be entirely the result of personal feeling. The truth is, the action of the majority of the country on this subject is the result, not of individual opinions, but the result of business interests which surround the tariff. The people of New Jersey could not be reckless of the business interests of his constituency like a senator from Arkansas and a senator from Mississippi. Mr. Jones, who has devoted patience and intelligence to the tariff action, although not surrounded by personal popularity, has been persistently borne in the direction the Senate bill as it finally passed body.

Nothing Was Risen due to

Whatever may have been done in the House in connection with the government, every one will admit it has been done slowly, out of place and out of time.

"For the first time in this history of the country the Conference committee never met for the transaction of business. The Republican members of the conference were excluded from all discussion and consideration of the question.

"The tariff took place among the people representing the Democratic party, have no means of knowing. Everybody knows this bill is not a tariff. It is a tariff in view, contained party perjury and party dishonesty, was passed by the House, and that they violated every rule enable them to pass it. Now, what is that bill. I am sorry to say that although I am on the Committee, I have no opportunity to examine the items and to discuss the reasons for them. That bill must be tested like any other bill. The House has 200,000 men who know best out of all that believe the results to this country will be very disastrous, but they are not in the House.

"I desire to point out to you the fact that at a time when the revenue of the country are decreasing, when it is estimated that the country will lose 100,000,000 of interest-bearing bonds, expenditures of the first session of Fifty-third Congress with both houses adjourned, was \$37,000,000, the expenditures of the first session of the Fifty-first Congress by \$27,000,000. The chairman of the committee on appropriations has endeavored to make the figures show that would indicate the first session of the Fifty-first Congress, which was Democratic, was 600,000 more economic than the session of the Fifty-second Congress, which was Republican. The House of which was Democratic. But comparison of figures will show that the pensions for that session of the Fifty-second Congress were 900,000, while those of the Fifty-third Congress were \$151,000,000 which makes this difference of \$3,000,000. In other words, we have deposited \$3,000,000 in the treasury."

in such a way as to make it impossible for service to the country to be repaid of the silver purchasing power under the Sherman act might have been of some service to country and to the people of the world. But the ledge in the state, the long and protracted debate the continuous opposition, the rejection of the act and the unwillingness of the country to make any further sacrifices of the country, that is the basis upon which the business of the country may adjust itself upon a lower plane of wages with safety and security. The ledge is laid, and the sacrifices of the country, that

Mr. Blaine said that the "free-trade" tariff of 1846, the last in our history, was satisfactory to all parties; Mr. Morrill said the tariff of 1891 was designed as a temporary war measure and not as a permanent peace tariff; the McKinley act is the crowning atrocity of a series of legislation designed to benefit the classes at the expense of the masses. and Orchard, Me., Aug. 25.—Ex-Speaker James B. Reed opened the Republican campaign in this state here this afternoon with a speech which called forth the heartiest cheers from the thousands of people. Mr. Reed's main effort was to show that the "Democratic party had become itself incapable of running the country satisfactory, not only to the majority of the people but even to the large minority which helped compose it." His argument was as follows: "In saying the Democratic party has become itself incapable of running the country in a manner satisfactory, not only to the majority of the people, but to the large and respectable minority, which helps to compose it, I am not indulging in any language of partisanship, but in the language of truth, known and acceptable to all who hear me today. The

men like the Republicans, and men of business sense and business ability. The difficulty with the Democratic party today, as it has been for many years, is that the great majority resides in the southern men are men of intelligence, men of business sense and men of learning. The difficulty with them is kind of learning which arises from thorough knowledge of business as it is carried on in the north. The men of the south may have every opportunity to read in books of the prosperity which is made to come to the north, but it is, as have those who have followed it. As he devoted to the theory of a by-gone day. His mind is not in the position to understand the practical prosperity of his part of the country in the days before the war.

It would be a great mistake for the people of the United States to suppose the action of the Senate, so much as it is, is the action of a democracy. A man can people is something which is defensible; the protection in spots, protection here and protection there, is a thing which is justly open to the charges which are falsely made against the free protection.

Then Mr. Wilson's bill, which was framed with reference to the wishes of New England and of the manufacturers of a certain description who have been dallying with democracy, is a thing which it there met the varied interests of the country in a more full and complete fashion, and meeting those interests, it was brought to the House amended by 600 and more amendments, and changed in its character and in its design so much that the majority of the House absolutely declined to receive it. Then ensued a struggle, the like of which has never before been a part of the history of the country, and the majority which ought never to be a part of the history of any democracy.

Tommy is Shocked.

Working the Pension Racket.

"By the Democratic party and the country in general, was to be deemed to be entirely the result of personal feeling. The truth is, the action of the majority of the subjects is the result, not of individual opinions, but the result of business interests which surround the tariff. The people of New Jersey could not be reckless of the business interests of his constituency like a senator from Arkansas and a senator from Mississippi. Mr. Jones, who has devoted patience and intelligence to the tariff action, although not surrounded by personal popularity, has been persistently borne in the direction the Senate bill as it finally passed body.

Nothing Was Risen due to

Whatever may have been done in the House of Representatives by the government, every one will admit has been done slowly, out of place and out of time.

"For the first time in this history of the country the Conference committee never met for the transaction of business. The Republican members of the conference were excluded from all discussion and consideration of the question.

"The tariff took place among the people representing the Democratic party, have no means of knowing. Everybody knows this bill is not a tariff. The tariff is a view, contained party perjury and party dishonesty, was passed by the House, and that they violated every rule enable them to pass it. Now, what is that bill. I am sorry to say that although I am on the Committee, I have no opportunity to examine the items and to discuss the reasons for them. That bill must be tested like any other bill. The House of Representatives those who know best about it believe the results to this country will be very disastrous, but it is too late to do anything now.

"I desire to point out to you the fact that at a time when the revenue of the country are decreasing, when it is estimated that the country will lose 100,000,000 of interest-bearing bonds, expenditures of the first session of Fifty-third Congress with both houses adjourned, will be \$100,000,000. The expenditures of the first session of the Fifty-first Congress by \$27,000,000. The chairman of the committee on appropriations has endeavored to make the figures which would indicate the first session of the Fifty-first Congress, which was Democratic, was 600,000 more economic than the session of the Fifty-second Congress, which was of the House of which was Democratic. But comparison of figures will show that the pensions for that session of the Fifty-second Congress were 900,000, while those of the Fifty-third Congress were \$151,000,000 which makes this difference of \$3,000,000. In other words, we have deposited \$3,000,000 in the hands of the pensioners."

in such a way as to make it impossible for service to the country in the repeal of the silver purchasing act under the Sherman act might have been of some service to country and to the people of the world. But the ledge in the late, the long and protracted debate the continuous opposition, the rejection of the tariff and the unwillingness of the tariff not willing, respectively, to the bill to which Mr. Wilson's name was only attached. But there is only one thing from which we must free our minds, and that is the idea that the country has been misled. It is the basis upon which the business of the country may adjust itself upon a lower plane of wages with safety, and the business of the world may be conducted on a lower plane. That
